GOOGLE SEARCH TRICKS

Well we can name this as hidden Google secrets or Advanced Google searching.

A screenshot of the Google search homepage. The word "Google" is centered in its signature font. Below it is a search bar with a vertical cursor on the left. To the right of the search bar is a microphone icon. Below the search bar are three buttons: "Google Search", "I'm Feeling Lucky", and "Search by voice".

GOOGLE OPERATOR

Type the following highlighted words in Google search box.
below you will find the most important ones:

Click on the example Google trick, and You will be redirected to Google.

define: - This Google operator will find definitions for a certain term or word over the Internet. Very useful when you come across a strange word when writing a post. I use this as a google dictionary. example : (define computer)

info: - The Google info operator will list the sets of information that Google has from a specific website (i.e. info:http://hack2007.50webs.com)

site: - This Google operator can be used to see the number of indexed pages on your site i.e.site:www.hack2007.50webs.com). Alternative it can also be used to search for information inside a specific site or class of sites.

link: - This google link operator allows you to find back links pointing to your site. Unfortunately the count is not updated frequently and not all back links are shown

allinurl: - Using this Google operator will limit the search to results that contain the desired keywords on the URL structure. (i.e. allinurl:dailybloggr)

GOOGLE OPERATOR(CONT'D)

fileformat: - Useful Google operator for finding specific file formats. Sometimes you know that the information you are looking for is likely to be contained in a PDF document or on a PowerPoint presentation, for instance. (i.e. “fileformat:.pdf market research” will search for PDF documents that contain the terms “market” and “research”)

TOP 10 GOOGLE SEARCH TRICKS
